Approved for public release; distribution is unlimited.

Abstract: Over the past few years, a series of Regional Supplements to the 1987 U.S. Army Corp of Engineers (USACE) Wetland Delineation Manual have been published, and currently the National Wetland Plant List is being updated. To support these efforts, we generated a list of floras and field guides for each USACE region—Alaska, Arid West, Atlantic and Gulf Coastal Plain, Caribbean, Eastern Mountains and Piedmont, Great Plains, Midwest, Northcentral and Northeast, Pacific Islands, and Western Mountains, Valleys and Coast. Each list includes regional floras, state floras, local floras, regional field guides, state field guides, and local field guides. We also prepared a list of floras and field guides that cover the entire U.S. This list is divided into the following categories: forbs, shrubs, trees, grasses and sedges, ferns, orchids, cacti and agave, and references and help guides. The flora and field guide lists can serve as tools for wetland delineation and restoration, assigning of wetland indicator statuses to vegetation species, and other vegetation activities.

Report Documentation Page

Preface

This report was prepared by Robert W. Lichvar and Lindsey Dixon, both of the Remote Sensing/Geographic Information Systems (RS/GIS) and Water Resources Branch, Cold Regions Research and Engineering Laboratory (CRREL), U.S. Army Engineer Research and Development Center (ERDC), Hanover, NH. This research was funded by the Wetland Regulatory Assistance Program (WRAP) under the U.S. Army Corps of Engineers' Regulatory Program. This study was conducted under the general supervision of Timothy Pangburn, Chief, RS/GIS and Water Resources Branch; Dr. Justin B. Berman, Chief, Research and Engineering Division; Dr. Lance Hansen, Deputy Director; and Dr. Robert E. Davis, Director. Permission to publish was granted by Director, CRREL.

COL Kevin J. Wilson was the Commander of ERDC, and Dr. Jeffery P. Holland was the Director.

1 Introduction

Background

In 1995 the National Research Council recognized the need for “regionalization” of wetland delineation approaches and methodologies based on differences in climate, hydrologic and geologic conditions, and other wetland characteristics, concluding that a single national manual could not take into consideration all of these ecological differences within the U.S. Since 2006, the U.S Army Corp of Engineers (USACE) has released 10 interim Regional Supplements to its Wetland Delineation Manual (Environmental Laboratory 1987) as part of a nationwide effort to address regional wetland characteristics that are important for identifying and delineating wetlands. Each supplement is region specific and has an updated wetland delineation procedure to improve accuracy and efficiency (Wakeley 2002).

The National Wetland Plant List (NWPL) is also in the process of being updated, led by the U.S. Army Corp of Engineers in collaboration with the U.S. Fish and Wildlife Service (FWS), the U.S. Environmental Protection Agency (EPA), and the Natural Resources Conservation Service (NRCS). The NWPL has not been updated since 1988. During the initial development of the plant list in 1988, a wetland fidelity rating system was created that was based on habitat information obtained from floras and other literature combined with input from the collaborating agencies and others. This rating system, based on each taxon’s frequency of occurrence in wetlands versus uplands, ultimately led to the five indicator statuses listed in the 1988 list (i.e., obligate wetland, facultative wetland, facultative, facultative upland, and obligate upland) (Lichvar and Minkin 2008). The process for the current update follows guidelines that allow for more scientifically acceptable procedures (Lichvar and Minkin 2008). For the current update, National and Regional Panels that have representatives from the Corps, FWS, EPA, and NRCS were responsible for the first draft of the list, which had specific categories of wetland plants reviewed by external professional botanists. The list has been published in the *Federal Register*, and Federal and state agencies and the public can provide input using a web-based system, allowing more field knowledge and scientific information to be considered when assigning a species a particular wetland indicator status. After the NWPL update is completed in 2012, the website will

have annual reviews and regular nomenclatural updates, and any indicator status can be challenged at any time, which will allow the website to contain the most up-to-date indicator statuses (Lichvar and Minkin 2008). Although the new indicator statuses will be based on the most recent scientific data, floras will remain the place to identify plant species, as well as important sources of habitat information.

The new Regional Supplements and updated NWPL both use the USACE regions as boundaries (Wakeley 2002; Lichvar and Minkin 2008), which represents an acknowledgment of the different environmental factors used to develop the regions and the general plant distributions and floristic literatures associated with them. To augment these efforts, we have generated a list of floras and field guides for each of these regions, as well as a separate list for the entire U.S. and its territories. These lists of references can serve as a useful resource for wetland professionals for wetland delineation and restoration, for developing species lists for various reasons at a site, and for locating additional ecological information about species occurring at these sites.

Floras vs. Field Guides

Floras and field guides are useful for plant identification, but they have different audiences and layouts. Floras tend to be more technical and comprehensive, often dealing with taxonomic interpretations. Field guides typically use a more visual layman's approach to identifying more of the common species.

Flora can be defined in two ways. As defined by Dictionary.com (2010), "flora" refers to "the plants of a particular region or period, listed by species and considered as a whole." As defined by the Oxford Virtual Field Herbarium (Forest Research Programme 2010), "flora" refers to a book that has detailed descriptions of all plants in a region, including dichotomous keys and taxonomic details of species. Some authors prefer to capitalize "Flora" when referring to the publication and use the lowercase "flora" when referring to the actual vegetation (Palmer et al. 1995). For the purpose of this report, we will refer to the publications using the lowercase "flora."

The introductory sections of a typical flora usually present a history of plant collectors who collected specimens in the area of the flora, as well as information regarding the topography, geology, and landscape setting of

the study area. This section is usually followed by dichotomous keys that guide the user to either families or genera, and lastly to the species level. Most floras provide morphological descriptions of the species, and many times they are accompanied by illustrations. Floras are intended for users with some technical training and knowledge about plant morphology. Floras and technical manuals tend to be bulky and are not always suitable for use in the field.

A field guide can be defined as a “book designed to be carried outdoors and used to identify species of plants or other particulars of natural history” (Schmidt 1999). Field guides come in many varieties, unlike floras, which tend to have a similar format and structure. The keys in field guides also vary but most commonly include the styles of dichotomous, table, or visual keys with illustrations or silhouettes of species to be identified. Field guides tend to be portable (frequently pocket sized); illustrated with diagnostic drawings or photos of the species; and filled with descriptions of physical details, habits, distribution, and other facts relevant to identification. Field guides in general have less taxonomic and morphological detail than floras and tend to include aspects of habitat and morphology that are less essential for identification. Unlike floras, field guides are intended for use by laypeople who lack experience and specific training in technical identification of plants.

2 Methods

A web-based search was performed to find all floras and field guides that pertain to each USACE region: Alaska, Arid West, Atlantic and Gulf Coastal Plain, Caribbean Islands, Eastern Mountains and Piedmont, Great Plains, Midwest, Northcentral and Northeast, Pacific Islands, and Western Mountains, Valleys and Coast (Figure 1).

Figure 1. U.S. Army Corp of Engineers Wetland Delineation Regions.

The largest database we searched in this effort was the *International Field Guides* website at the University Library of the University of Illinois at Urbana Champaign created by Diane Schmidt (Schmidt 1998). This resource cites field guides for plants, animals, and other objects around the world. To add to the initial list, a Google book search was performed for each state to determine what sources were available. Also, general literature searches were done across the nation to obtain additional citations to add to the list. Once the initial draft list was compiled, the Regional Panels were requested to review and revise it.

The final step in developing the lists was cross-referencing and reviewing a prior list of references developed by the Biota of North America Program (BONAP) that was shared by Dr. John Kartesz and Misako Nishino (Kartesz and Nishino 2010). The BONAP list included 406 botanical references, of which we incorporated 137 into our lists. We narrowed the BONAP list by deleting sources that we already had and selecting only works that were published floras or field guides. Other references not used from the BONAP list included atlases, bibliographies, bulletins, catalogues, checklists, contributions, databases, indexes, internet resources, manuscripts, newsletters, proceedings, theses and dissertations, and unpublished materials. Also, we chose not to include floras and field guides published before 1900.

The final lists, which can be found in Appendices A–K by region alphabetically, are divided into regional floras, state floras, local floras, regional field guides, state field guides, and local field guides. Each regional reference also lists all states or islands included in that region. The regional floras and field guides are usable in the entire USACE region and anywhere throughout the region they cover. All references listed for a state are specific to that state and may extend into more than one region, depending on how many regions are within that state. In this case, a state reference with overlapping regions will be listed in all regions within which it falls. Local floras and field guides apply to a very specific area within a region and are typically smaller than the state floras and field guides. Local references can include a number of areas, including a specific location, mountain range, site, national monument, state park, or national park. These references may also apply to multiple regions and are listed in all regions within which the area occurs. Floras or field guides that fall into one group in one region may fall into a different group within another, depending on the area the reference encompasses and how much of that area falls within a particular region.

We also compiled a list of floras and field guides that were applicable to all regions. Field guides in this list are broken down into groups: forbs, shrubs, trees, grasses and sedges, ferns, orchids, cacti and agave, and references and help guides. The section on references and help guides includes references that describe plant terminology, plant identification techniques, information about plant families, and other information that may be useful when identifying plant species. Some of the references on this list may not apply to the Caribbean and Pacific Island Regions.

3 Results

In the list of all regions, there are 19 floras and 57 field guides that can be applied to the entire U.S. and its territories. Table 1 shows the number of regional, state, and local floras and field guides for each USACE region. The regional lists can be found in the appendices. Total numbers in the table include multiple volumes; for example, the *Intermountain Flora* (Cronquist et al. 1972) in the Arid West region has seven volumes, so it was counted as seven floras for that region. Alaska has no regional floras or field guides as the region only encompasses one state. State floras and field guides in the Caribbean and Pacific Islands are replaced with island floras and field guides. A total of all the references has not been calculated because references overlap within the regions.

Table 1. Number of regional, state, and local flora and field guides in each USACE region.

USACE Region	Botanical Reference	Regional	State	Local	Total
Alaska	Floras	0	4	3	7
	Fields Guides	0	15	16	31
Arid West	Floras	7	20	29	56
	Field Guides	56	85	67	208
Atlantic and Gulf Coastal Plain	Floras	8	23	10	41
	Field Guides	41	91	41	173
Caribbean Islands	Floras	1	26	0	27
	Field Guides	13	27	3	43
Eastern Mountains and Piedmont	Floras	9	35	9	53
	Field Guides	47	79	25	151
Great Plains	Floras	4	21	18	43
	Field Guides	36	78	36	150
Midwest	Floras	6	38	4	48
	Field Guides	33	76	14	123
Northcentral and Northeast	Floras	7	33	9	49
	Field Guides	51	78	27	156
Pacific Islands	Floras	3	2	2	7
	Field Guides	9	20	0	29
Western Mountains, Valleys and Coast	Floras	14	18	23	55
	Field Guides	54	64	91	209

4 Discussion

The flora and field guide lists for each USACE region can serve as a literature resource in support of wetland delineation and restoration, biological surveys, and other vegetation activities. These compiled lists of floras and field guides provide an overview of existing botanical resources available for use in identifying wetland, as well as non-wetland, species for both the professional and non-professional. When using floras and fields in conjunction with the NWPL, it should be noted that the NWPL has the most recent updated nomenclature, while many floras and field guides do not. The NWPL provides a function where you can view synonyms and infra-specifics of the species updated nomenclature.

Floras and field guides are making a transition from hard-copy books to digital products. This overview provides a state-of-the-science list of published hard-copy treatments. The works listed here typically can be obtained from libraries, bookstores, or publishers. These hard-copy references can generally be used in the field or office. In the future, more floristic works and field guides will be published digitally for access online. Those digital applications will be developed for use on desktop computers as well as hand-held field devices. We expect that digital publishing will become standard for floras and field guides.

Regional Field Guides

Antonio, T. M., and S. Masi. 2001. *The Sunflower Family in the Upper Midwest: A Photographic Guide to the Asteraceae in Illinois, Indiana, Iowa, Michigan, Minnesota and Wisconsin*. Indianapolis, IN: Indiana Academy of Science in collaboration with Chicago Botanic Garden.

Batson, W. T. 1984. *A Guide to the Genera of the Eastern Plants*. Columbia, SC: University of South Carolina Press.

Blackburn, B. 1952. *Trees and Shrubs in Eastern North America*. New York, NY: Oxford University Press.

Blouin, G. 2004. *Weeds of the Woods: Small Trees and Shrubs of the Eastern Forest*. Halifax, NS: Nimbus Publishing.

Boughton, C. 1963. *A Field Guide to the Ferns and Their Related Families of Northeastern and Central North America*. Boston, MA: Houghton Mifflin.

Brown, H. P. 1938. *Trees of the Northeastern United States, Native and Naturalized*. Boston, MA: Christopher Publishing House.

Brown, L. 1976. *Wildflowers and Winter Weeds*. New York, NY: W.W. Norton.

Brown, L. 1992. *Grasses: An Identification Guide*. Boston, MA: Houghton Mifflin Harcourt.

Brown, P. M. 1997. *Wild Orchids of the Northeastern United States: A Field and Study Guide to the Orchids Growing Wild in New England, New York, and Adjacent Pennsylvania and New Jersey*. Ithaca, NY: Comstock Publishing.

Clemants, S. E., and C. Gracie. 2006. *Wildflowers in the Field and Forest: A Field Guide to the Northeastern United States*. New York, NY: Oxford University Press.

Cobb, B., E. Farnsworth, and C. Lowe. 2005. *A Field Guide to Ferns and their Related Families: Northeastern and Central North America*. Second edition. Boston, MA: Houghton Mifflin.

Cope, E. A. 1986. *Native and Cultivated Conifers of Northeastern North America: A Guide*. Ithaca, NY: Cornell University Press.

Core, E. L., and N. P. Ammons. 1958. *Woody Plants in Winter: A Manual of Common Trees and Shrubs in Winter in the Northeastern United States and Southeastern Canada*. Morgantown, WV: West Virginia University Press.

- Courtenay, B., and J. H. Zimmerman. 1972. *Wildflowers and Weeds*. New York, NY: Van Nostrand Reinhold.
- DeGraaf, R. M., and P. E. Sendak. 2006. *Native and Naturalized Trees of New England and Adjacent Canada: A Field Guide*. Hanover, NH: University Press of New England.
- Duncan, W. H., and M. B. Duncan. 1999. *Wildflowers of the Eastern United States*. Athens, GA: University of Georgia Press.
- Fernald, M. L., and A. Gray. 1970. *Manual of Botany: A Handbook of the Flowering Plants and Ferns of the Central and Northeastern United States and Adjacent Canada*. New York, NY: Van Nostrand Reinhold Co.
- Graves, A. H. 1956. *Illustrated Guide to Trees and Shrubs: A Handbook of the Woody Plants of the Northeastern United States and Adjacent Regions*. New York: Harper and Brothers.
- Grimm, W. C. 1983. *The Illustrated Book of Trees, With Keys for Summer and Winter Identification*. Harrisburg, PA: Stackpole Books.
- Grimm, W. C. 1992. *The Illustrated Book of Wildflowers and Shrubs: The Comprehensive Field Guide to More than 1,300 Plants of Eastern North America*. Harrisburg, PA: Stackpole Books.
- Harlow, W. M. 1957. *Trees of the Eastern and Central United States and Canada*. New York: Dover Publications.
- Harlow, W. M. 1959. *Fruit Key and Twig Key to Trees and Shrubs: Fruit Key to Northeastern Trees, Twig Key to the Deciduous Woody Plants of Eastern North America*. New York: Dover Publications.
- Jennings, O. E. 1953. *Wild Flowers of Western Pennsylvania and the Upper Ohio Basin*. Pittsburgh, PA: University of Pittsburgh Press.
- Knobel, E. 1972. *Identify Trees and Shrubs by their Leaves: A Guide to Trees and Shrubs Native to the Northeast*. New York: Dover Publications.
- Leopold, D. J., W. C. McComb, and R. N. Muller. 1998. *Trees of the Central Hardwood Forests of North America: An Identification and Cultivation Guide*. Portland, OR: Timber Press.
- Levine, C. 1995. *A Guide to Wild Flowers in Winter: Herbaceous Plants of Northeastern North America*. New Haven, CT: Yale University Press.
- Lichvar, R. 2005. *Common Wetland Delineation Sedges of the Northeast*. ERDC/CRREL TN-05-4. Hanover, NH: U.S. Army Engineer Research and Development Center, Cold Regions Research and Engineering Laboratory.
- Little, E. L. 1980. *The Audubon Society Field Guide to North American Trees: Eastern Region*. New York: Alfred A. Knopf.
- Magee, D. W. 1981. *Freshwater Wetlands: A Guide to Common Indicator Plants of the Northeast*. Amherst, MA: University of Massachusetts Press.

- Miller, H. A., and H. E. Jaques. 1978. *How to Know the Trees*. Dubuque, IA: W.C. Brown.
- Muenschner, W. C. L. 1955. *Keys to Woody Plants*. Ithaca, NY: Cornell University Press.
- Newcomb, L. 1977. *Newcomb's Wildflower Guide: An Ingenious New Key System for Quick, Positive Field Identification of the Wildflowers, Flowering Shrubs and Vines of Northeastern and North Central North America*. Boston, MA: Little, Brown.
- Niering, W. A., and N. C. Olmstead. 1979. *The Audubon Society Field Guide to North American Wildflowers: Eastern Region*. New York: Alfred A. Knopf.
- Oslund, C., and M. Oslund. 2002. *What's Doin' the Bloomin'?: Pictorial Field Guide to Wildflowers, by Season, of the Upper Great Lakes Regions, Eastern Canada and Northeastern U.S.* Duluth, MN: Plant Pics LLP.
- Pennell, F. W. 1935. *The Scrophulariaceae of Eastern Temperate North America*. Monograph 1: 1–650. Philadelphia, PA: Academy of Natural Sciences.
- Peterson, R. T., and M. McKenny. 1968. *A Field Guide to Wildflowers of Northeastern/Northcentral North America*. Boston, MA: Houghton Mifflin.
- Petrides, G. A. 1972. *A Field Guide to Trees and Shrubs: Field Marks of all Trees, Shrubs, and Woody Vines that Grow Wild in the Northeastern and Northcentral United States and in Southeastern and South-Central Canada*. Boston, MA: Houghton Mifflin.
- Petrides, G. A. 1998. *A Field Guide to Eastern Trees: Eastern United States and Canada, Including the Midwest*. Boston, MA: Houghton Mifflin.
- Pierce, R. J. 1977. *Wetland Plants of the Eastern United States*. New York: North Atlantic Division, U.S. Army Corps of Engineers.
- Redington, C. B. 1994. *Plants in Wetlands*. Dubuque, IA: Kendall/Hunt Publishing.
- Rickett, H. W. 1966-1973. *Wild Flowers of the United States*. Volume 1. *The Northeastern States*. New York: McGraw-Hill.
- Rosendahl, C. O. 1963. *Trees and Shrubs of the Upper Midwest*. Minneapolis, MN: University of Minnesota Press.
- Stein, J. D., D. Binion, and R. E. Acciavatti. 2003. *Field Guide to Native Oak Species of Eastern North America*. Morgantown, WV: U.S. Dept. of Agriculture, Forest Service, Forest Health Technology Enterprise Team.
- Tiner, R. W. 1987. *A Field Guide to Coastal Wetland Plants of the Northeastern United States*. Amherst, MA: University of Massachusetts Press.
- Tiner, R. W. 1997. *Winter Guide to Woody Plants of Wetlands and their Borders: Northeastern United States*. Leverett, MA: Institute for Wetland and Environmental Education and Research.

- Tiner, R. W., A. Rorer, and R. H. Wiegand. 1988. *Field Guide to Nontidal Wetland Identification*. Annapolis, MD: Maryland Department of Natural Resources; Newton Corner, MA: Water Resources Administration.
- Tyron, A. F., and R. C. Moron. 1997. *The Ferns and Allied Plants of New England*. Lincoln, MA: Center for Biological Conservation, Massachusetts Audubon Society.
- Uva, R. H., J. C. Neal, and J. M. DiTomaso. 1997. *Weeds of the Northeast*. Ithaca, NY: Comstock Publishing Associates.
- Wherry, E. T. 1995. *The Fern Guide, Northeastern and Midland United States and Adjacent Canada*. New York: Dover Publications.
- Williams, M. D. 2007. *Identifying Trees: An All-Season Guide to Eastern North America*. Mechanicsburg, PA: Stackpole Books.
- Woodward, C. H., and H. W. Rickett. 1979. *Common Wild Flowers of the Northeastern United States*. Woodbury, NY: Barron's.

State Field Guides

- Ahmadjain, V. 1979. *Flowering Plants of Massachusetts*. Amherst, MA: University of Massachusetts Press.
- Antonio, T. M., and S. Masi. 2001. *The Sunflower Family in the Upper Midwest: A Photographic Guide to the Asteraceae in Illinois, Indiana, Iowa, Michigan, Minnesota and Wisconsin*. Indianapolis, IN: Indiana Academy of Science in collaboration with Chicago Botanic Garden.

13. SUPPLEMENTARY NOTES					
14. ABSTRACT Over the past few years, a series of Regional Supplements to the 1987 U.S. Army Corp of Engineers (USACE) Wetland Delineation Manual have been published, and currently the National Wetland Plant List is being updated. To support these efforts, we generated a list of floras and field guides for each USACE region—Alaska, Arid West, Atlantic and Gulf Coastal Plain, Caribbean, Eastern Mountains and Piedmont, Great Plains, Midwest, Northcentral and Northeast, Pacific Islands, and Western Mountains, Valleys and Coast. T Each list includes regional floras, state floras, local floras, regional field guides, state field guides, and local field guides. We also prepared a list of floras and field guides that cover the entire U.S. This list is divided into the following categories: forbs, shrubs, trees, grasses and sedges, ferns, orchids, cacti and agave, and references and help guides. The flora and field guide lists can serve as tools for wetland delineation and restoration, assigning of wetland indicator statuses to vegetation species, and other vegetation activities.
